IR Ingersoll-Rand®

Service Manual

S/N 572711001 & Above

Doosan purchased Bobcat Company from Ingersoll-Rand Company in 2007. Any reference to Ingersoll-Rand Company or use of trademarks, service marks, logos, or other proprietary identifying marks belonging to Ingersoll-Rand Company in this manual is historical or nominative in nature, and is not meant to suggest a current affiliation between Ingersoll-Rand Company and Bobcat Company or the products of either.

MAINTENANCE SAFETY

WARNING

Instructions are necessary before operating or servicing machine. Read and understand the Operation & Maintenance Manual, Handbook and signs (decals) on machine. Follow warnings and instructions in the manuals when making repairs, adjustments or servicing. Check for correct function after adjustments, repairs or service. Untrained operators and failure to follow instructions can cause injury or death.

W-2003-0199

 **Safety Alert Symbol:** This symbol with a warning statement, means: "Warning, be alert! Your safety is involved!" Carefully read the message that follows.

 Never service the Ingersoll-Rand Loader Backhoe without instructions.

 Always use an approved lift arm support device when servicing the loader backhoe with the lift arm raised. Replace the lift arm support device if damaged or missing.

 Disconnecting or loosening any hydraulic tubeline, hose, fitting component, or part failure can cause lift arms or backhoe boom to drop.

 Cleaning and maintenance are required daily.

 NEVER modify equipment or add attachments not approved by Ingersoll-Rand.

 Have good ventilation when welding or grinding painted parts.

 Wear dust mask when grinding painted parts. Toxic dust and gas can be produced.

 Vent exhaust to outside when engine must be run for service.

 Exhaust system must be tightly sealed. Exhaust fumes can kill without warning.

 Never work on loader backhoe with lift arms raised unless supported by an approved lift arm support device.

 Always lower the backhoe bucket to the ground before doing any maintenance.

 Stop, cool and clean engine of flammable materials before checking fluid.

 Never service or adjust machine with the engine running unless instructed to do so in the manual.

 Avoid contact with leaking hydraulic fluid or diesel fuel under pressure. It can penetrate the skin or eyes.

 Never fill fuel tank with engine running, while smoking or when near open flame.

 Keep body, jewelry and clothing away from moving parts, electrical contacts, hot parts and exhaust.

 Wear eye protection to guard from battery acid, compressed springs, fluids under pressure and flying debris when engines are running or tools are used. Use eye protection approved for type of welding.

 Keep engine cover closed except for service. Close and latch engine cover before operating the loader backhoe.

 Lead-acid batteries produce flammable and explosive gases.

 Keep arcs, sparks, flames and lighted tobacco away from batteries.

 Batteries contain acid which burns eyes or skin on contact. Wear protective clothing. If acid contacts body, flush well with water. For eye contact flush well and get immediate medical attention.

Maintenance procedures which are given in the Operation & Maintenance Manual can be performed by the owner/operator without any specific technical training. Maintenance procedures which are not in the Operation & Maintenance Manual must be performed **ONLY BY QUALIFIED Ingersoll-Rand SERVICE PERSONNEL**. Always use genuine Ingersoll-Rand replacement parts.

FOREWORD

This manual is for the Ingersoll-Rand loader mechanic. It provides necessary servicing and adjustment procedures for the Ingersoll-Rand loader and its component parts and systems. Refer to the Operation & Maintenance Manual for operating instructions, Starting procedure, daily checks, etc.

A general inspection of the following items must be made after the loader has had service or repair:

- | | | | |
|--|---|---|---|
| <p>1. Check that ROPS mounting hardware is tightened and is Ingersoll-Rand approved.</p> |  | <p>9. Bob-Tach wedges and linkages must function correctly and be in good condition.</p> |  |
| <p>2. The seat belt must be correctly installed, functional and in good condition.</p> |  | <p>10. Safety treads must be in good condition.</p> |  |
| <p>3. Check lift arm support device, replace if damaged.</p> |  | <p>11. Check for correct function of indicator lamps (Optional on some models).</p> |  |
| <p>4. Machine signs must be legible and in the correct location.</p> |  | <p>12. Check hydraulic fluid level, engine oil level and fuel supply.</p> |  |
| <p>5. Foot pedal must return to neutral.</p> |  | <p>13. Inspect for fuel, oil or hydraulic fluid leaks.</p> |  |
| <p>6. Check for correct function of the work lights</p> |  | <p>14. Lubricate the loader backhoe.</p> |  |
| <p>7. The parking brake must function correctly.</p> |  | <p>15. Check the condition of the battery and cables.</p> |  |
| <p>8. Enclosure door latches must open and close freely.</p> |  | <p>16. Inspect the air cleaner for damage or leaks. Check the condition of the element.</p> |  |

Dealer Copy -- Not for Resale

17. Check the electrical charging system.

20. Operate the loader and check all functions.

18. Check tires for wear and pressure.

21. Check for any field modification not completed.

19. Inspect for loosen or broken parts or connections.

22. Recommend to the owner that all necessary corrections be made before the machine is returned to service.

Dealer Copy -- Not for Resale

**CALIFORNIA
PROPOSITION 65 WARNING**

Diesel engine exhaust and some of its constituents are known to the State of California to cause cancer, birth defects and other reproductive harm.

Dealer Copy -- Not for Resale

SAFETY INSTRUCTIONS

Safe Operation Is The Operator's Responsibility

Carefully follow the operating and maintenance instructions in this manual.

The Ingersoll-Rand loader backhoe is highly maneuverable and compact. It is rugged and useful under a wide variety of conditions. This presents an operator with hazards associated with off highway, rough terrain applications, common with Ingersoll-Rand loader backhoe usage.

The Ingersoll-Rand loader backhoe has an internal combustion engine with resultant heat and exhaust. All exhaust gasses can kill or cause illness so use the loader backhoe with adequate ventilation.

The dealer explains the capabilities and restrictions of the Ingersoll-Rand loader backhoe and attachments for each application. The dealer demonstrates the safe operation according to Ingersoll-Rand instructional materials, which are also available to operators. The dealer can also identify unsafe modifications or use of unapproved attachments. The attachments and buckets are designed for a Rated Operating Capacity (some have restricted lift heights) and secure fastening to the Ingersoll-Rand loader or Rated Lift Capacity for the backhoe. The user must check with the dealer, or Ingersoll-Rand literature, to determine safe loads of materials of specified densities for the loader backhoe-attachment combination.

The following publications and training materials provide information on the safe use and maintenance of the Ingersoll-Rand loader backhoe and attachments:

- The Delivery Report is used to assure that complete instructions have been given to the new owner and that the Ingersoll-Rand loader backhoe and attachment is in safe operating condition.
- The Operation & Maintenance Manual delivered with the Ingersoll-Rand loader backhoe or attachment gives operating information as well as routine maintenance and service procedures. It is a part of the machine and can be stored in a container provided inside the cab of the loader backhoe. Replacement Operation & Maintenance Manuals can be ordered from your Ingersoll-Rand dealer.
- Machine signs (decals) instruct on the safe operation and care of your Ingersoll-Rand loader backhoe or attachment. The signs and their locations are shown in the Operation & Maintenance Manual. Replacement signs are available from your Ingersoll-Rand dealer.

- An Operator's Handbook is fastened to the operator cab of the loader backhoe. Its brief instructions are convenient to the operator. The Handbook is available from your dealer in an English edition or one of many other languages. See your Ingersoll-Rand dealer for more information on translated versions.
- The Safety Manual delivered with Ingersoll-Rand loader backhoe gives general safety information.
- See the ADDITIONAL PUBLICATIONS Page in this manual or your Ingersoll-Rand dealer for Service and Parts Manuals, printed materials, videos, or training courses available. Also check the Ingersoll-Rand web site www.ingersoll-rand.com

The dealer and owner/operator review the recommended uses of the product when delivered. If the owner/operator will be using the machine for a different application(s) he must ask the dealer for recommendations on the new use.

Call Before You Dig

1-888-258-0808

When you call, you will be directed to a location in your state/city for information about buried lines (telephone, cable TV, water, sewer, gas, etc.)

SI17-1003

SAFETY INSTRUCTIONS (CONT'D)

FIRE PREVENTION

The machines and some attachments have components that are at high temperatures under normal operating conditions. The primary source of high temperatures is the engine and exhaust system. The electrical system, if damaged or incorrectly maintained, can be a source of arcs or sparks.

Flammable debris (leaves, straw, etc.) must be removed regularly. If flammable debris is allowed to accumulate, it can cause a fire hazard. Clean often to avoid this accumulation. Flammable debris in the engine compartment is a potential fire hazard.

- Do not use the machine where exhaust, arcs, sparks or hot components can contact flammable material, explosive dust or gases.
- The operator cab, engine compartment and engine cooling system must be inspected every day and cleaned if necessary to prevent fire hazards and overheating.
- Check all electrical wiring and connections for damage. Keep the battery terminals clean and tight. Repair or replace any damaged part.
- Check fuel and hydraulic tubes, hoses and fittings for damage and leakage. Never use open flame or bare skin to check for leaks. Tighten or replace any parts that show leakage. Always clean fluid spills. Do not use gasoline or diesel fuel for cleaning parts. Use commercial nonflammable solvents.
- Do not use ether or starting fluids on any engine which has glow plugs. These starting aids can cause explosion and injure you or bystanders.
- Always clean the machine, disconnect the battery, and disconnect the wiring from the electronic controllers before welding. Cover rubber hoses, battery and all other flammable parts. Keep a fire extinguisher near the machine when welding. Have good ventilation when grinding or welding painted parts. Wear dust mask when grinding painted parts. Toxic dust or gas can be produced.
- Stop the engine and let it cool before adding fuel. No smoking!
- Use the procedure in the Operation & Maintenance Manual for connecting the battery and for jump starting.

- Know where fire extinguishers and first aid kits are located and how to use them. Fire extinguishers are available from your Ingersoll-Rand dealer.

NOTE: The engine in this machine is NOT equipped with a spark arrestor exhaust system. It is in violation of California Public Resource Code Section 4442 to use or operate this engine on or near any forest-covered, brush-covered or grass-covered land unless the exhaust system is equipped with a spark arrestor meeting any applicable spark arrestor. All spark arrestors must be properly maintained.

SI19-0603

SERIAL NUMBER LOCATION

Always use the serial number of the loader backhoe when requesting service information or when ordering parts. Early or later models (identification made by serial number) may use different parts, or it may be necessary to use a different procedure in doing a specific service operation.

Loader Backhoe Serial Number

Figure 1

The loader backhoe serial number plate is located under the loader lift arm on the left side [Figure 1].

Explanation of loader Serial Number:

XXXX	XXXXX
Model 1.-Model/ Engine Combination	Model 2.-Production Sequence (Series)

1. The four digit Model/Engine Combination Module number identifies the model number and engine combination.
2. The five digit Production Sequence Number identifies the order which the loader is produced.

Engine Serial Number

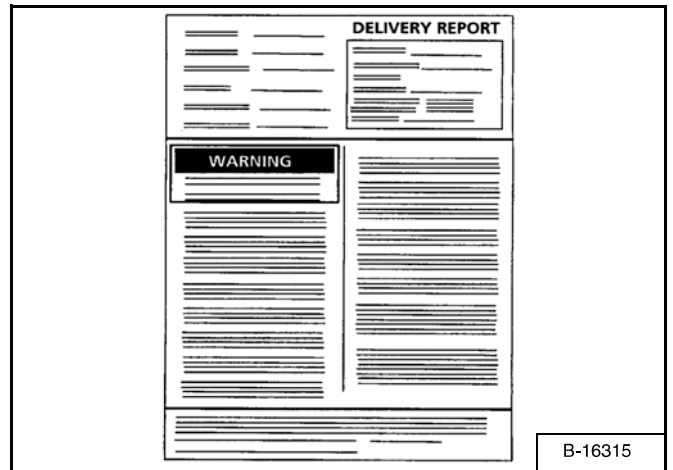

Figure 2

The engine serial number is located on the valve cover at the right side of the engine [Figure 2].

DELIVERY REPORT

Figure 3

The Delivery Report must be filled out by the dealer and signed by the owner or operator when the Ingersoll-Rand loader backhoe is delivered. An explanation of the form must be given to the owner. Make sure it is filled out completely [Figure 3].

Dealer Copy -- Not for Resale

LOADER BACKHOE IDENTIFICATION

Dealer Copy -- Not for Resale

◇ BUCKET - Several different buckets and other attachments are available for the Ingersoll-Rand loader backhoe.
 * Roll Over Protective Structure (ROPS) per SAE J1040 and ISO 3471 and Falling Object Protective Structure (FOPS) per ISO 3449, Level I.

! WARNING

Instructions are necessary before operating or servicing machine. Read and understand the Operation & Maintenance Manual, Handbook and signs (decals) on machine. Follow warnings and instructions in the manuals when making repairs, adjustments or servicing. Check for correct function after adjustments, repairs or service. Untrained operators and failure to follow instructions can cause injury or death.

W-2003-0199

Figure 10-10-1

Read the removal and installation, disassembly and assembly, etc., completely to become familiar with the procedure before beginning [Figure 10-10-1].

Always park the loader backhoe on a level surface.

Stop the engine, and engage the parking brake.

! WARNING

Put jackstands under the front and rear axle before running the engine for service. Failure to use jackstands can allow the machine to fall or move and cause injury or death.

W-2461-0303

Figure 10-10-2

Lift the rear of the loader backhoe and install jackstands [Figure 10-10-2].

Figure 10-10-3

NOTE: Loader lift arms are raised for photo clarity.

Lift the front of the loader backhoe and put jackstands under the axle [Figure 10-10-3].

Note: Make sure the jackstands do not touch the tires.
